

COVID - 19

CRISIS,

A NEW DAWN OF DIGITAL CONNECTIVITY OVERLOAD.

Innovative technologies from the hearth

With millions around the world doing just about every element of their lives from home, connectivity has never been so important at a single common time. Data and information keeps coming in and going out, far and wide across the globe. At DigitalGae Technologies it has been a period of lightning speed mode of operation. As a leading telecommunications partner in Botswana, DigitalGae Technologies is tasked with keeping networks up and efficient for Batswana. In his own words, Chief Executive Officer Stuart Dixon expressed that everyone at the 100% citizen owned company is relishing the challenge of keeping networks reliable during a time of unprecedented over subscription.

“Our company endeavours to provide cost-effective, reliable and state-of-the-art telecommunications and ICT solutions. Our vast experience and technical excellence have positioned us to deliver a full range of telecommunication related products and services - from radio planning and consultation to wireless & wired product installation, even during this unusual time for all humanity. In recent years, we have drawn Project Management skills form Innolead Consulting, our sister company, and applied them relentlessly to become cutting edge in terms of service delivery”, he said with enthusiasm. Stuart is an accomplished Business Transformation Leader, Telecommunications Expert,

and Programme Director with over 30 years of industry experience, having led successful delivery of complex ICT programmes, business transformation and change programs. He has served a diverse client base of telecommunications operators (fixed and mobile), financial institutions, public sector, utility and defense organizations in the UK and overseas.

DigitalGae re-affirmed commitment to service excellence and innovation, as enshrined in the company’s mission statement: provision of high-end innovative technology solutions targeted at improving productivity levels in Botswana in an impactful manner.

Operations & Technical Manager Mr Gobuamang Mogapi highlighted that innovation is at the epicentre of the company’s strategic thrust, especially during these uncertain times. “We have one goal and one goal only, to be number one in high-end innovative ICT and telecommunications. The current unpleasant COVID - 19 crisis has set a burning platform for us to come to the fore and ensure reliable connectivity. We have responded promptly and significantly strengthened the capability of our clients such as BTC, Orange, BOFINET, Debswana, Liquid Telecom, Water Utilities Corporation, MOTV and Space Wave. Our skilled technicians have been working around the clock every day to optimize networks around the country, and we have started seeing fruits of their relentless efforts”, he said. With his more than 17 years

of experience in the telecommunications environment from operations to technical range, Mogapi’s understanding of Botswana’s environment across many industries is surely in a league of a few.

The fast paced company’s service offerings further include Critical Communications, Wireless Communications Equipment, Radio Network Planning, ICT Integration and Consultancy, Managed Services, NOC Services, Cybersecurity, Data Centre (design, build, operate), and Critical Asset protection system. These are offered with global leading partners such as **RADWIN, ALEPO, NEC, IRIS, HP, MOTOROLA, CABLEFREE, EDIMAX, KLEOS and SIKLU**
