

NCOJANE PRIMARY SCHOOL INSTALLATIONS BY BOFINET AND DIGITALGAE

NCOJANE SCHOOL GETS SUPER FAST INTERNET CONNECTION

RADWIN NEO Series which complements RADWIN'S extensive PtMP portfolio that utilizes the unlicensed 5GHz spectrum has been deployed to serve Ncojane Primary School with more than 200 Mbps speeds.

The RADWIN fixed wireless Radios were installed and commissioned by seasoned and trained engineers of Digitalgae Technologies. As Botswana moves towards being a knowledge-based economy, it is without a doubt that high-speed internet in remote rural areas is essential, and as such, Digitalgae technologies prides itself with the Radwin Neo series solution which is a bargain whilst also managing delivery of quality and up to standards high-speed internet services.

NCOJANE SCHOOL BRINGS OUT THE BEST OF BOFINET AND DIGITALGAE TECHNOLOGIES

Bofinet serves the Ghanzi district school with more than 500 Mbps aggregate internet connectivity through Digitalgae Technologies led microwave radio solutions. Digitalgae Technologies was subcontracted by Bofinet to give the school access to internet services with their new Radwin Neo radio solutions. The out-of-fiber coverage area is now receiving speeds like those of fiber due to the reliability and robustness of the Radwin Neo PtMP and the SU Air radio.
